

# Year 1 and 2 Week 1

## Maths

For maths you can investigate shape. Why don't you find different shapes in your house? Which 3D shapes can you find?

Can you investigate place value and the value of a number. We have attached some work sheets so you can try to sequence numbers and find patterns.

You can play bingo so you can recognise numbers and challenge yourselves by saying what is 10 or 20 more or less than the given number.

Why don't you do some baking and weighing so you can understand grams and litres and how many equal portions you can make?

You can use chalk outside to measure 2 metres so you can understand social distancing better.

## Writing / PSHCE

You could fill in an "All about me" sheet so you can give it to your teacher when you next see them.

Mrs Brown is telling you all about her journey through lock down and how she felt. You could try to write about your journey and say how you were feeling and why.

Why don't you draw a map of a walk you have been on and then write directions so Mrs Brown and Mrs Parker can go on the walk too.

Prepare for an interview on what would make a good friend – what skills do you have?

Could you make a house for any snails you find and describe them? You could even write a story about them.

Write a description of something you have seen on your walk. Which adjectives could you use?

## Science

Why don't you go on a nature walk and see if you can find the objects.

Make a poster about how you can stay healthy and eat healthily. Write a menu for your family. What is their favourite meal?

## **Art**

Can you make a collage of your walk or our world using natural materials?

## **RE**

Show some happy family pictures and talk about their happy memories. Could you draw a picture of your own happy memory and make a photo frame out of twigs?

## **Reading**

The Twits is one of my favourite books. Why don't you read it and think of your own tricks?
