

## YEAR 4 HOME LEARNING WEEK 3. 18.1.21 – 22.1.21

Dear Parents/Carers,

Week 3, here we go! Thank you once again for all you're doing at home. I know it's challenging, especially if you're working at home too. I'm really enjoying seeing the work the children are doing at home so thank you for emailing this through to me. If you're struggling in any way, please do get in touch. You can email me or if you'd rather chat, I will happily give you a call. As previously mentioned, school staff are working on a 2 week rota system. I am working in school w/b 18.1.21 and w/b 1.2.21 Whilst I will check my emails regularly during those days, I won't be as available as I'll be teaching the children who are in school. On those weeks, if your question is urgent, you can contact Miss Hargreaves on [misshargreaves@oxenhope.bradford.sch.uk](mailto:misshargreaves@oxenhope.bradford.sch.uk)

Below is the timetable and planning for this week. Resources etc are all on the website. I have recorded some 'live' lessons for this week. These are denoted with **\*\* Live lesson with Miss Auty available\*\*** to help you see which lessons I've done this for. I really hope these are helpful for your child and that they enjoy engaging with them. I know that some of you have other things which you're doing with your children at home too. This is great and absolutely fine. I've seen some fabulous Science work going on using Christmas presents and also some lovely work from workbooks your children may already have. Please feel free to supplement your child's learning in this way if you wish. The work I'm providing is in line with the Year 4 curriculum and should be completed first but any other learning activities your child does will certainly be of no detriment to them at all. At the very bottom of this document, I've included some other things that are happening that I know of. If you're a Facebook user, plenty of things are being shared so keep your eyes peeled.

Thank you. Miss Auty

Hi Year 4! I hope you're all OK. Here is your work for this week. Use the website to find the resources you'll need for your lessons. Have fun and remember to email me all your great work to [missauty@oxenhope.bradford.sch.uk](mailto:missauty@oxenhope.bradford.sch.uk)

DAY	Morning warm up activity	Maths	Break and snack	English	Lunch	20 mins reading	Afternoon activity
Monday	See the ideas below for things to choose from.	Times tables		English			Art
Tuesday		Maths		Reading			Physical/outdoor
Wednesday		Mathletics and TTRS		English			Science
Thursday		Maths		Spelling			RE
Friday		Maths		GPS			Topic - Geography

Morning warm up activity.

Each morning, it's a good idea to do a short activity to get your brain going for the day. You can choose what this is but I've given you a few ideas here

- **Brain gym.** <https://www.youtube.com/watch?v=jgNjmWLtmxE> There are lots of YouTube videos for brain gym; this is just one I found. Brain gym is really good for getting both sides of your brain working together ready for your day.
- **Times tables.** Like we do at school, starting your day with 10 mins times tables work would be a great start.
- **Spelling.** Choose 5 spellings and write them out 5 times each.
- **Handwriting.** Work on your letter joins. Make sure your letters are neat and tidy. Check that your ascenders (the tall letters like b and d) go right up to the line.
- **Joe Wicks.** If you're feeling physical, you could join Joe for a morning workout.
  - **Colouring.** Mindful colouring will help you to focus for the day ahead. I've included some sheets on the website.

## **MATHS**

**Monday** \*\* Live lesson with Miss Auty available\*\* – times tables. Monday is times tables day. Choose a times table you need to work on and create the fact triangles like you did last week along with the 4 facts to create the fact family. Look on the website for my recorded lesson which will help you with this.

**Tuesday** \*\* Live lesson with Miss Auty available\*\* – multiplying 3 numbers. Today, we are going to learn how to multiply 3 numbers. Use my lesson to help you. The sheet you'll need once you've watched my introduction is on the website.

**Wednesday** – TTRS and/or mathletics. Log on to your account and work on your individual targets. In mathletics, use the multiplication and division section. If you're on TTRS, make sure you're working on your times table facts in the garage. If you work hard, you can have 10 mins at the end of the lesson to play with your avatar or something else of your choice.

**Thursday** Continuing with your learning about multiplying 3 numbers, can you complete the 2 challenges for today? The sheets you need are on the website.

**Friday** \*\* Live lesson with Miss Auty available\*\* Factor pairs. Watch my video then have a go at the rainbow sheet.

## **ENGLISH.**

**Monday. Oak Academy English.** <https://classroom.thenational.academy/lessons/to-explore-complex-sentences-68wp8c?activity=video&step=1> Here is the link for today's lesson. Make sure you have some paper and a pencil ready before you begin. Pause the video when there is a task to do to give yourself time to complete it. Towards the end of the lesson, you will have a go at writing the sentences. I'd like you to do 6 sentences please. You will know what to do when you've watched the video.

**Tuesday. Reading.** **\*\* Live lesson with Miss Auty available\*\*** Find the document called 'Reading Part A' on the website. This is the text and questions I'd like you to do today. You can watch my short video first to help you.

**Wednesday. Oak Academy English** <https://classroom.thenationalacademy/lessons/to-generate-vocabulary-ccwk2t?activity=video&step=1> Today, you're going to continue with 'The Robin's Journey' work. Use the link to the lesson. Remember to keep pausing the video to give you time to complete the written tasks.

**Thursday. Spelling.** **\*\* Live lesson with Miss Auty available\*\*** Use my lesson to help you with what to do today.

**Friday. GPS.** **\*\* Live lesson with Miss Auty available\*\*** Watch my lesson then do the sheet. We're learning about conjunctions today.

**ART** **\*\* Live lesson with Miss Auty available\*\*** Today, we're going to continue with our Kandinsky work. Use my lesson to help you know what to do. If you have paints, you'll need them for this lesson. If not, you can do this using pencil crayons, felt tips, wax crayons, pastels or whatever you have.

**RE** **\*\* Live lesson with Miss Auty available\*\*** Today, we are starting a new RE unit. Use my lesson introduction to help you get started then you'll need the RE sheet from the website.

**TOPIC (Geography)** Use the PowerPoint about compass points. Once you've worked through that, do the worksheet about compass points.

**SCIENCE** Continuing with our topic on sound, watch this video <https://www.youtube.com/watch?v=3-xKZKxXuu0> Use the sheet on the website to write what you have learnt about vibrations. Don't worry too much about how your ear works; we'll do more on this next week. If you want to make a musical instrument to show the vibrations, feel free but you don't have to do this. The work I'd like to see is your thought bubble filled with what you've learnt about how sounds are made.

## **PE/OUTDOOR**

It's really important to keep active so make sure you build some time in to your week to get physical. The children who are in school are having PE on Tuesday afternoon so that's when I've put it on your timetable but if a different afternoon is better, that's fine. You can choose what you do when you're working from home. Maybe you could ride your bike, scooter or roller blades. Perhaps you're a whizz on a skateboard. Maybe you want to play a sport in your garden like football, cricket or tennis. You could do something inside like Joe Wicks or create your own dance routine. How about making an obstacle course? Ask permission before you do this. If you're working outside, you could make a bug hotel or a den. Maybe you could collect natural items and create a picture. You could either do this inside or outside. How about working really big and doing a natural picture that fills a large space. Get busy, get active and have some fun!

## **OTHER THINGS**

There are loads of things happening on line which you can use as extra activities if you complete the work I've set for each week.

- From 9:00 to 12:00 each morning on CBBC, there are education programmes being shown.

- If you're feeling creative, have a look at <https://bit.ly/ArtsAwardVideos> for some fun things to do.
- Amazon are offering free downloads for Maths books which can be downloaded. Make sure you ask permission before you do this!
- Joe Wicks PE
- Chester Zoo live lessons BBC Teach
- National Marine Aquarium live lessons every Friday. See <http://bit.ly/AquariumLessons> for more information
- Cooking. The children in school are making pasta salad this week. Perhaps you could help make lunch or tea.
